

Develop an AJAX program that implements the Autocomplete feature for filling the country names as given below:

The image shows a web form with a label "Country :" followed by a text input field containing the letter "n". Below the input field is a dropdown list of country names. The list includes: Namibia, Nauru, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, and Norway. The "Nepal" option is currently selected and highlighted with a darker orange background.

Country
Namibia
Nauru
Nepal
Netherlands
New Zealand
Nicaragua
Niger
Nigeria
Norway

For Example, when N is entered all the names of the country starting with “N” should be listed in drop-down list for user’s easy selection. When “Na” is typed only “Namibia” and “Nauru” should be listed for selection. Use Servlet for server side scripting. Use MySQL database to store the countries names.
